

LeetCode Extension Complete Setup Guide

Step-by-step installation guide for LeetCode Tracker Companion

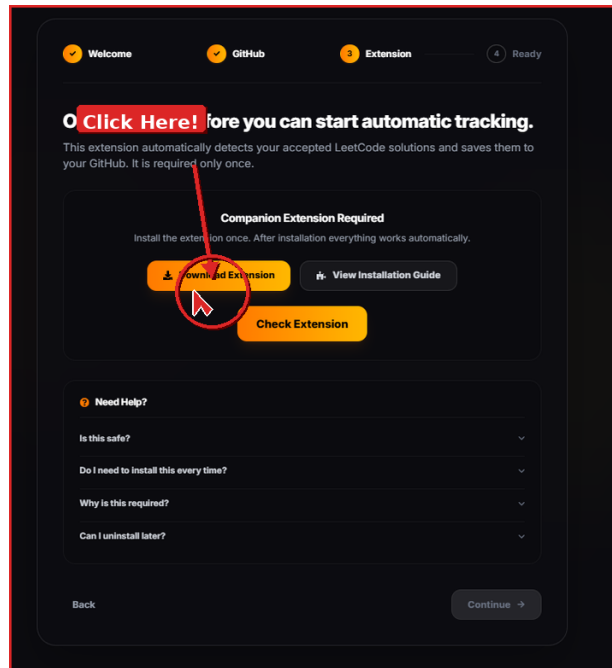

Browser: Google Chrome | Platform: Windows

Total Steps	17 Steps
Time Required	5-10 minutes
Browser	Google Chrome
Install Once?	Yes! Sirf ek baar install karni hai

Yeh guide LeetCode Tracker ki companion Chrome extension install karne mein help karegi. Extension ek baar install hone ke baad aapki LeetCode solutions automatically save hoti rahegi!

1

Click 'Download Extension' Button

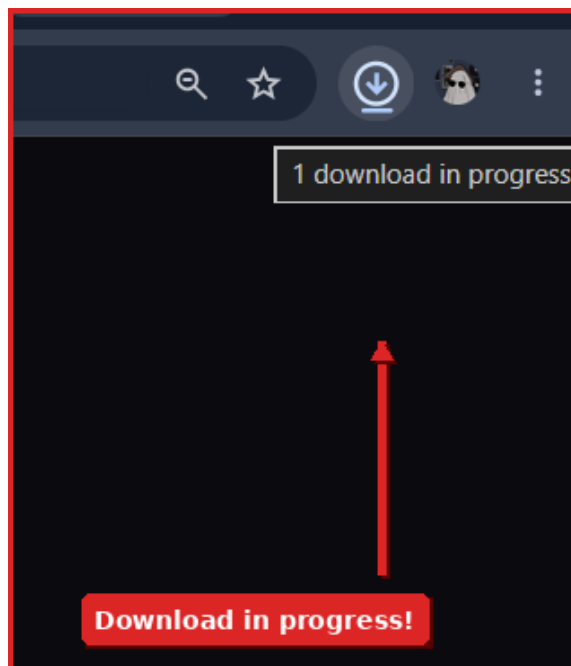

Website pe aane ke baad yeh setup screen dikhegi. Orange color ka 'Download Extension' button dikhega. Uss button pe click karo extension download karne ke liye.

=> Orange 'Download Extension' button pe click karo

2

Download Automatically Start Ho Gayi

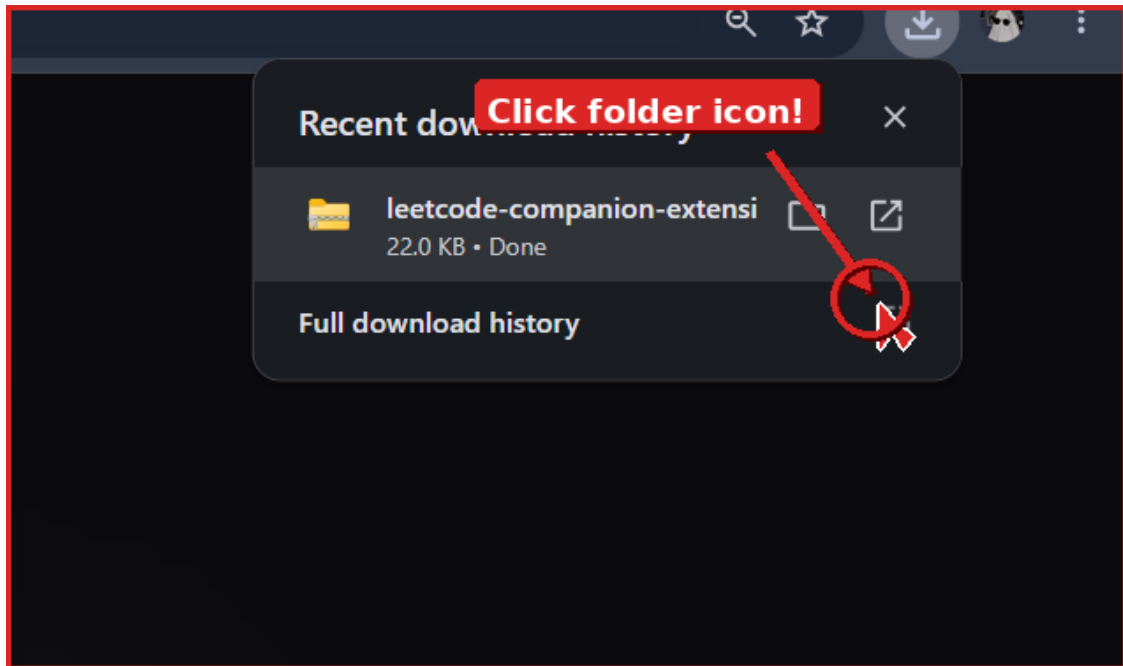

Click karte hi browser ke upar download icon mein progress dikhega. Extension file download ho rahi hai — thoda wait karo complete hone tak.

=> Wait karo jab tak download complete na ho jaye

3

Download Complete - Folder Icon Pe Click Karo

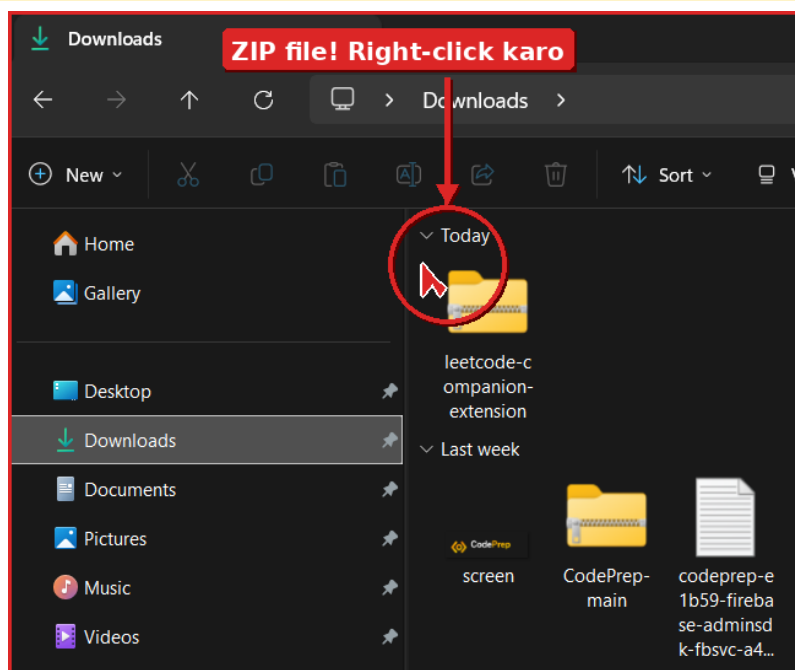

Download complete hone ke baad browser mein popup aayega. File name 'leetcode-companion-extensi' dikhega. Folder icon (small yellow folder) pe click karo — File Explorer open ho jayega.

=> **Folder icon pe click karo file location open karne ke liye**

4

Downloads Folder Mein ZIP File Dikhegi

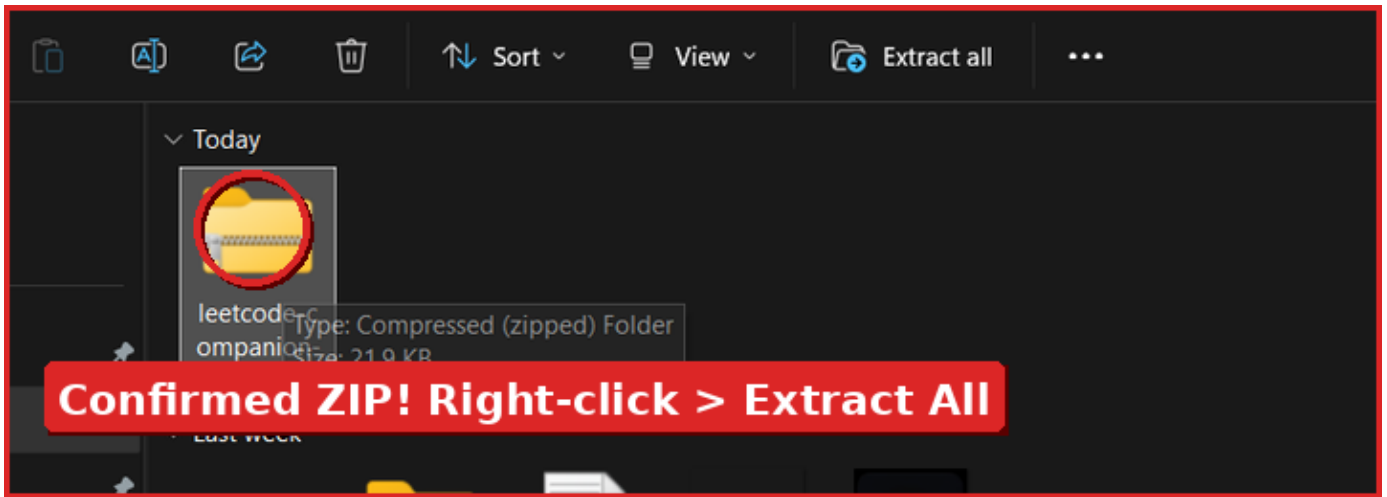

File Explorer automatically Downloads folder ke saath open hoga. 'Today' section mein 'leetcodes-companion-extension' naam ki ZIP file dikhegi. Is ZIP file ko extract karna hai.

=> **ZIP file pe right-click karo > 'Extract All' select karo**

5

ZIP File Confirm - 'Extract All' Select Karo

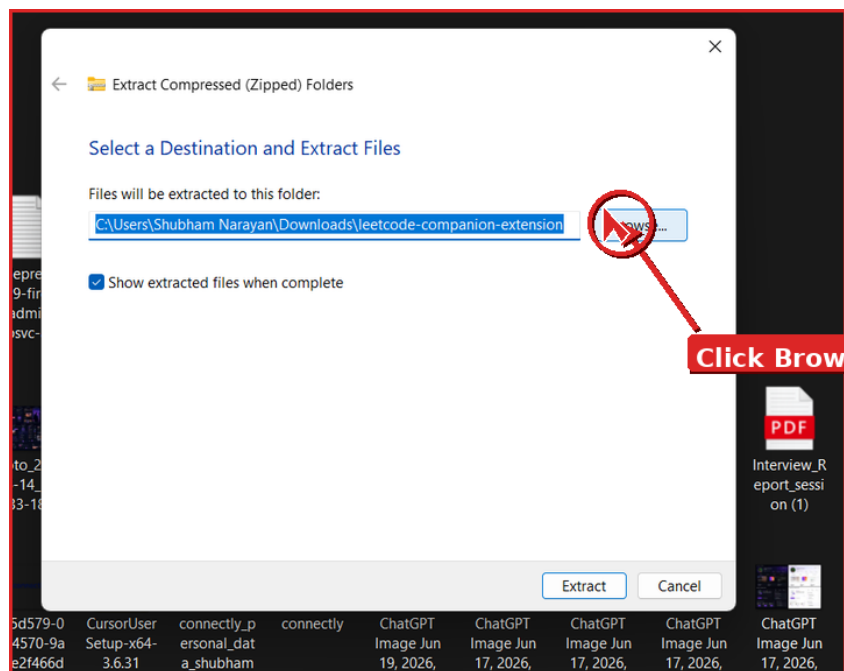

ZIP file pe hover karne se tooltip dikhega jo confirm karta hai ki yeh 'Compressed (zipped) Folder' hai (Size: 21.9 KB). Ab ise extract karna hai — right-click karke 'Extract All' select karo.

=> ZIP file pe right-click karo > 'Extract All' select karo

6

Extract Dialog - 'Browse' Button Click Karo

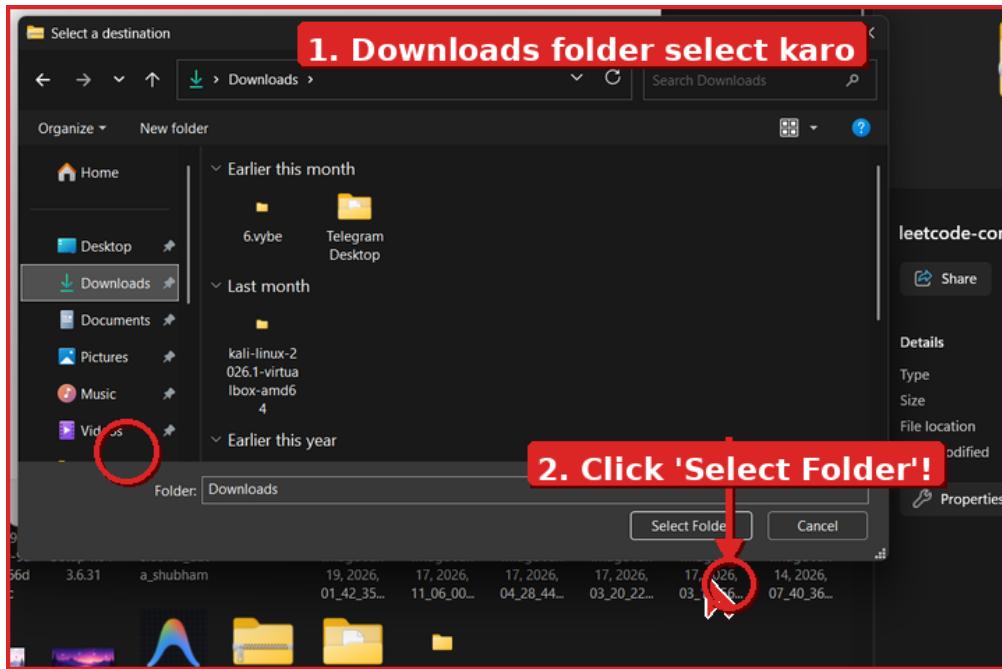

Extract dialog box aayega jisme default path dikhega. Hum destination Downloads folder mein change karenge. 'Browse' button pe click karo.

=> 'Browse' button pe click karo path change karne ke liye

7

Browse Dialog - 'Downloads' Folder Select Karo

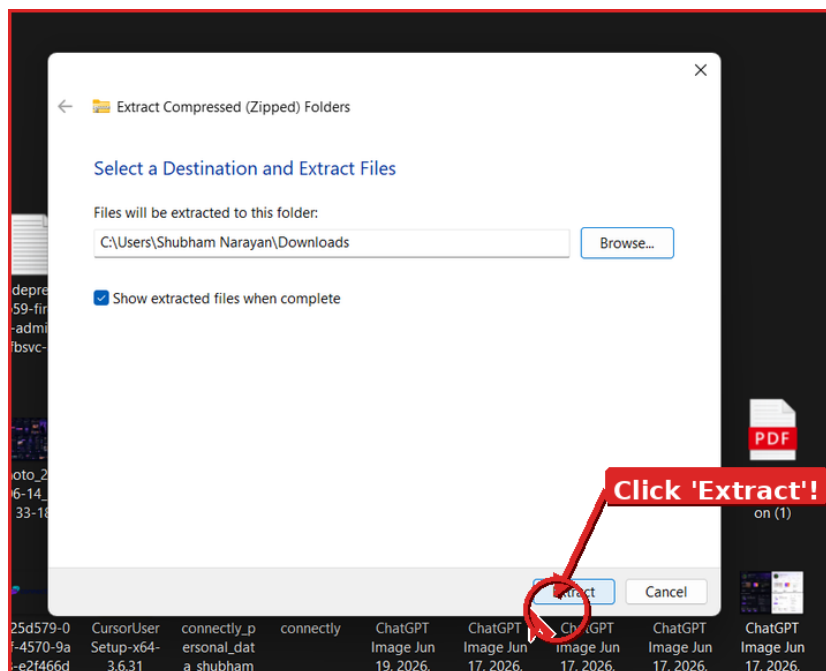

Folder selection dialog aayega. Left sidebar mein 'Downloads' pe click karo. Phir neeche 'Select Folder' button pe click karo confirm karne ke liye.

=> Left side 'Downloads' select karo, phir 'Select Folder' click karo

8

'Extract' Button Click Karo

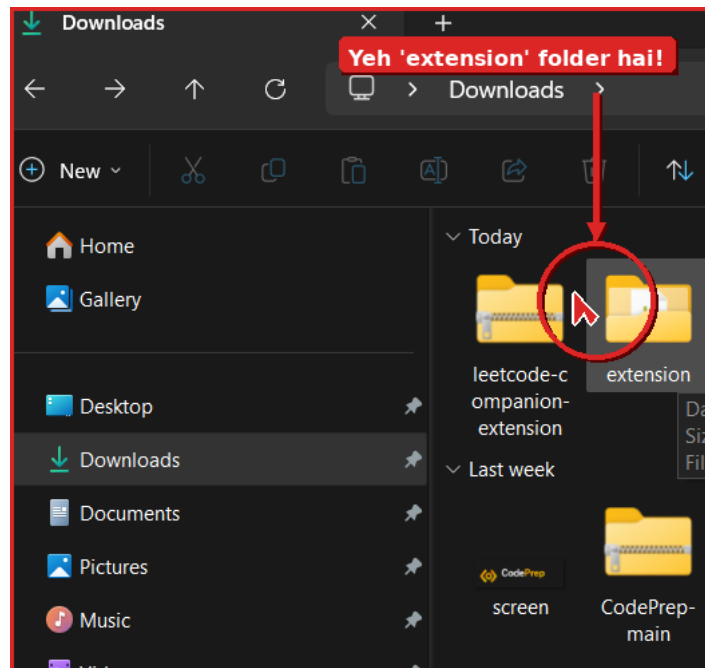

Ab path 'Downloads' folder ho gaya hai. Ab seedha 'Extract' button pe click karo. Files automatically ek naye 'extension' folder mein extract ho jayengi.

=> 'Extract' button pe click karo

9

Extracted 'extension' Folder Dikhegi

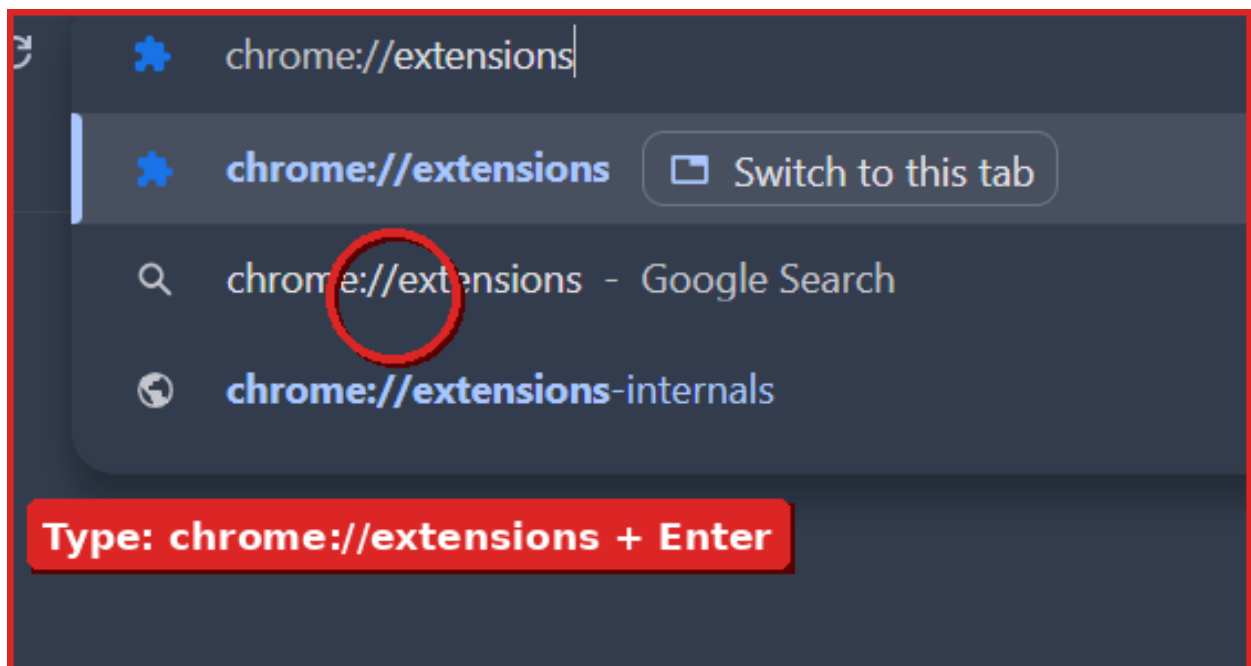

Extract hone ke baad Downloads folder mein 'extension' naam ka naya folder appear hoga. Yahi folder Chrome mein load karni hai (ZIP file nahi — sirf extracted 'extension' folder).

=> 'extension' folder note karo — yahi Chrome mein load hogi

10

Chrome Mein 'chrome://extensions' Type Karo

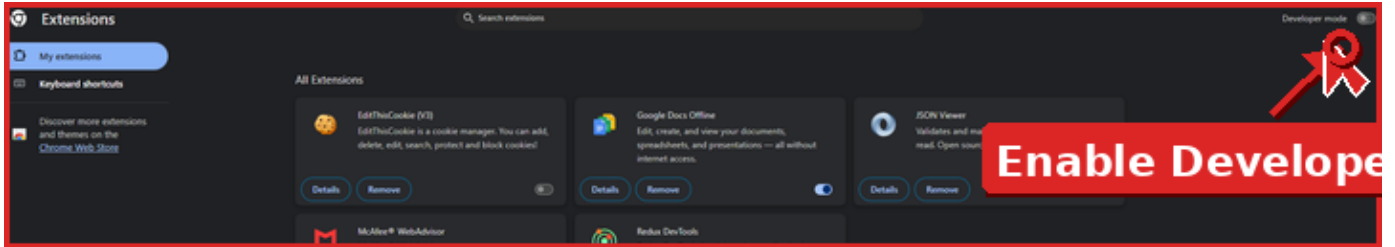

Chrome browser kholo. Address bar (URL bar) mein click karo aur type karo: chrome://extensions phir Enter dabao. Chrome ka Extensions management page khulega.

=> chrome://extensions type karo + Enter dabao

11

Developer Mode Toggle Enable Karo

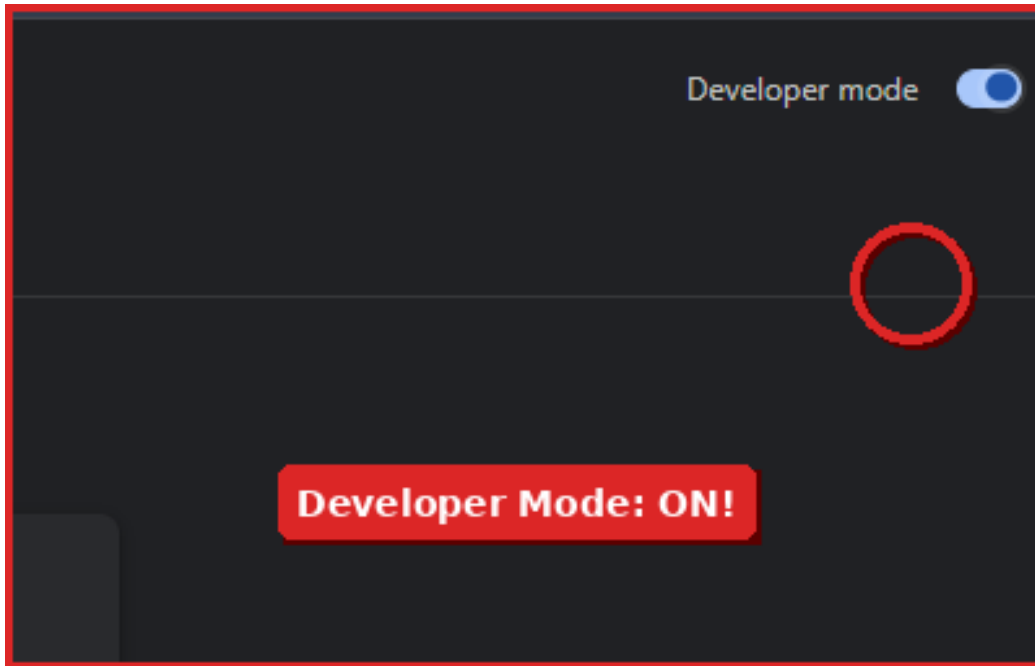

Chrome Extensions page pe top-right corner mein 'Developer mode' toggle dikhega. Usse click karke ON karo. Toggle blue ho jayega.

=> Top-right 'Developer mode' toggle ON karo

12

Developer Mode ON Ho Gaya!

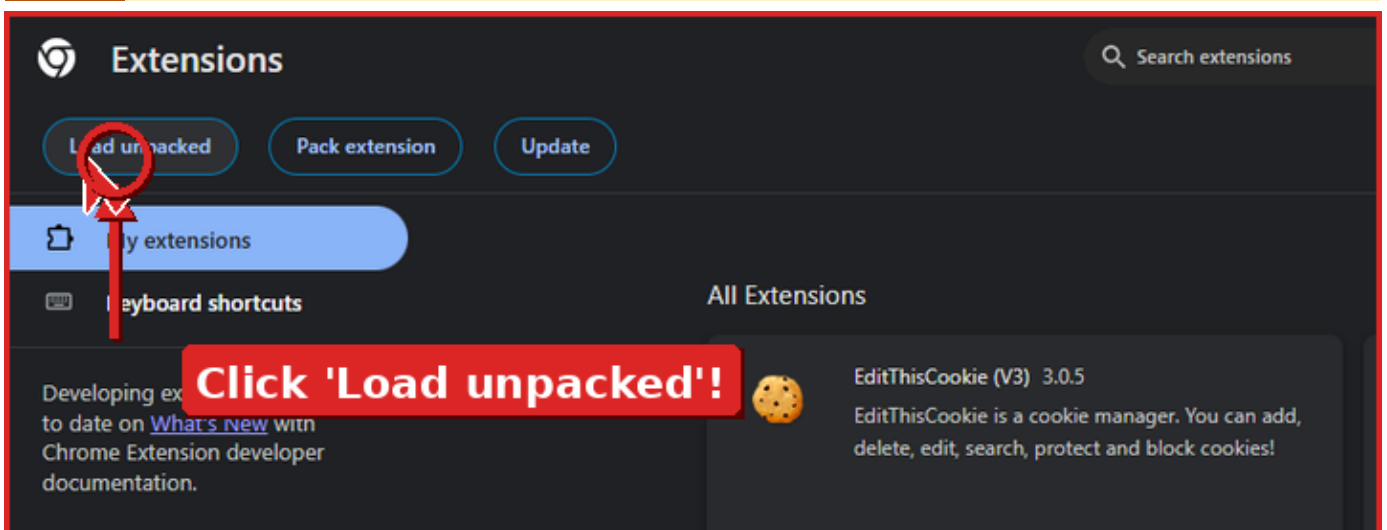

Toggle blue ho gaya — Developer mode successfully enabled! Ab automatically 'Load unpacked', 'Pack extension', 'Update' buttons top-left mein appear ho jayenge.

=> Developer Mode ON! Ab next step ke liye ready

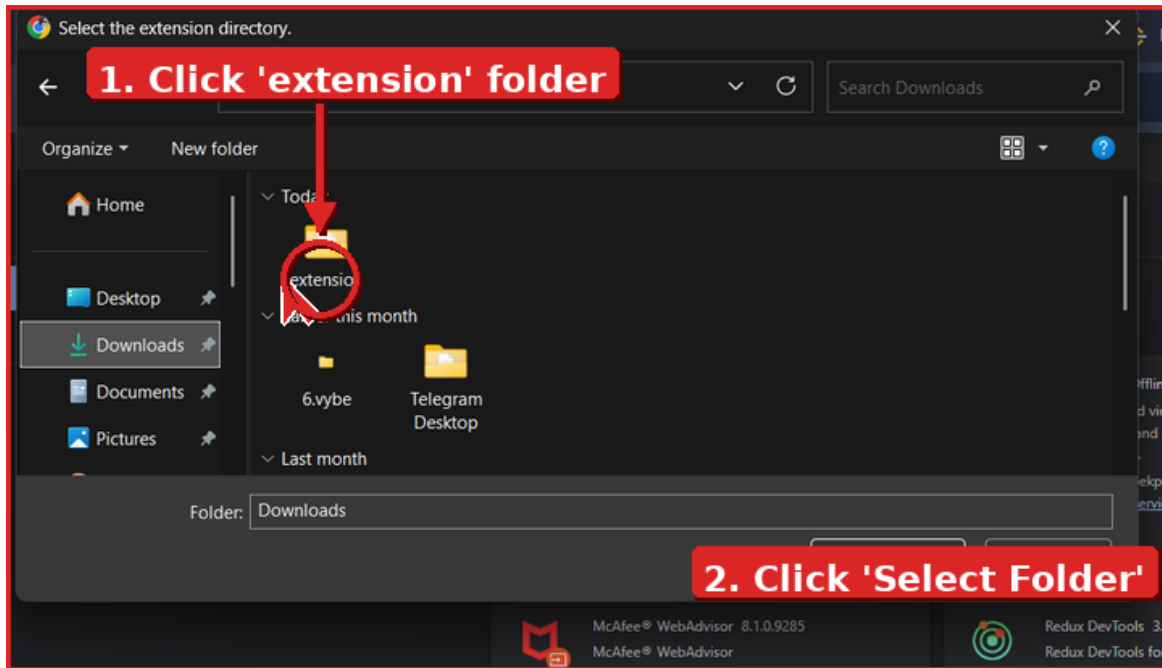

13

'Load unpacked' Button Pe Click Karo

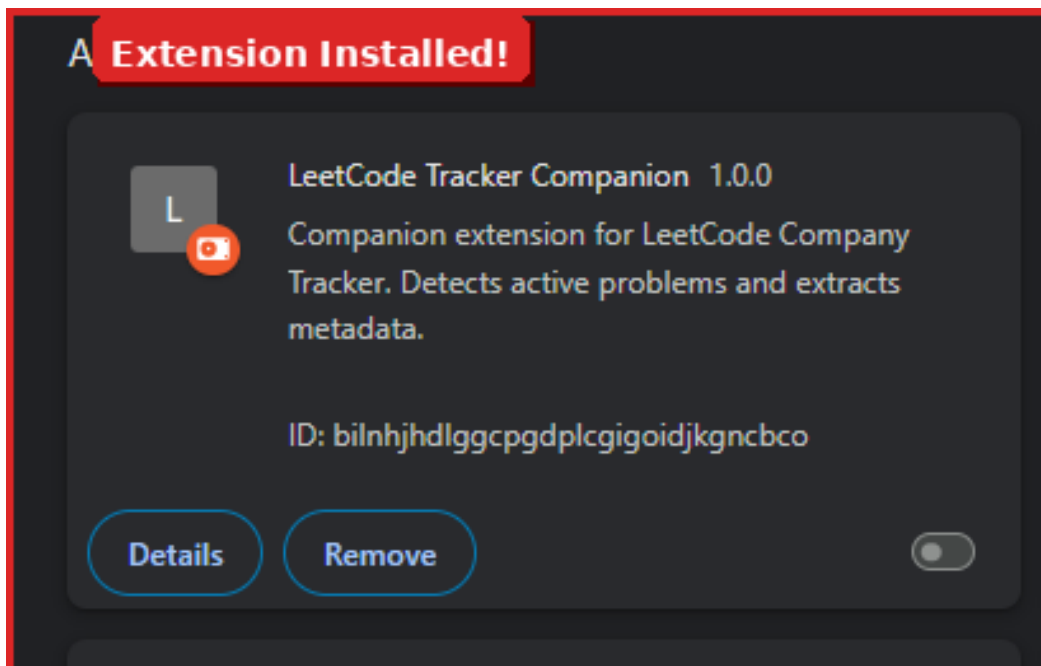

Developer mode ON hone ke baad Extensions page ke top-left mein 'Load unpacked' button appear hoga. Is button pe click karo.

=> 'Load unpacked' button pe click karo

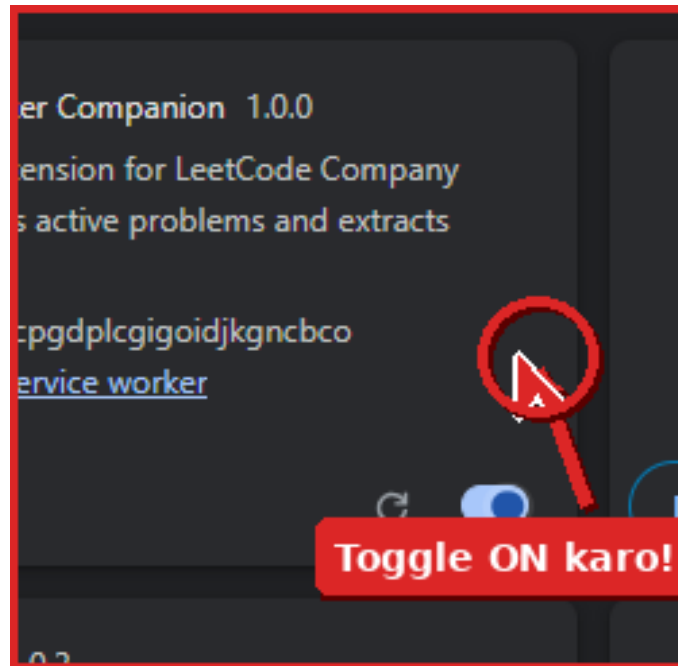

File picker dialog aayega. 'Today' section mein 'extension' folder dikhega (ZIP file nahi). Uss folder pe single-click karo — select ho jayega. Phir neeche 'Select Folder' button pe click karo.

=> 'extension' folder select karo, phir 'Select Folder' click karo

Congratulations! 'LeetCode Tracker Companion' v1.0.0 successfully install ho gayi! Extension 'All Extensions' list mein appear ho gayi hai. Ab use enable karo.

=> Extension install ho gayi! Ab toggle ON karo (next step)

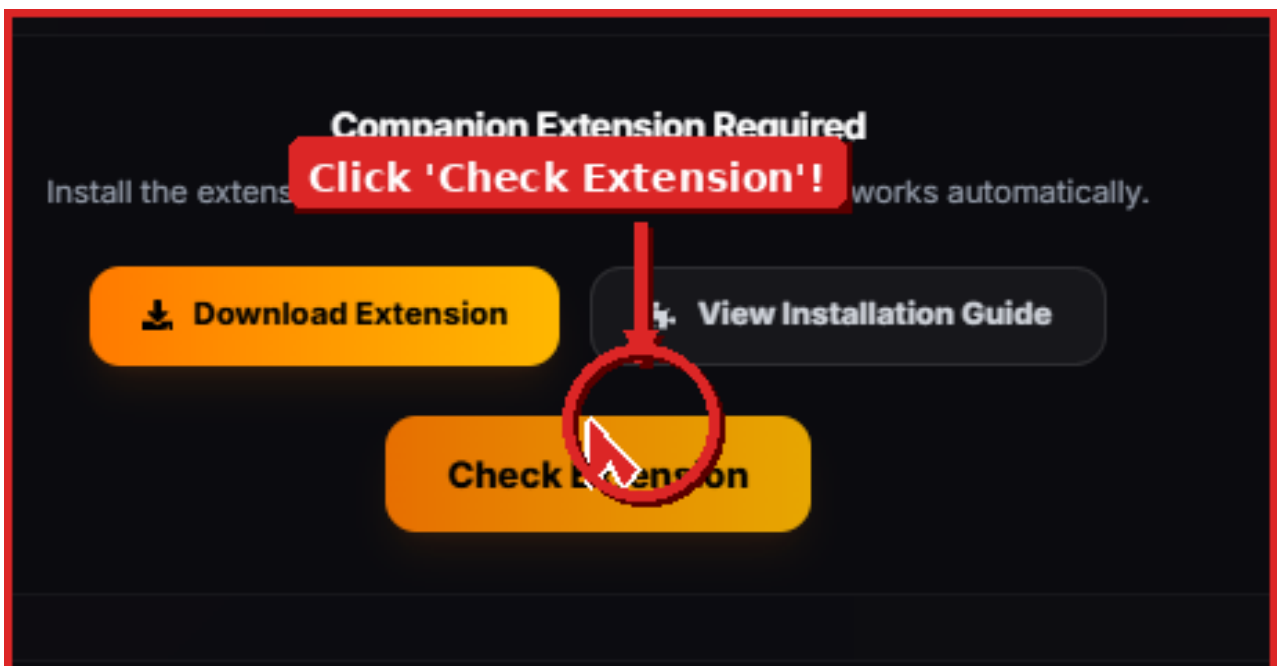

Extension install hone ke baad use enable karna zaroori hai. Extension card ke right side mein toggle dikhega — usse click karke ON (blue) karo.

=> **Extension toggle pe click karo — blue/ON karo**

17

Website Pe 'Check Extension' Click Karo — DONE!

Wapas website pe jao aur 'Check Extension' orange button pe click karo. Agar sab sahi install hua hai toh verification successful ho jayegi aur automatic tracking start ho jayega!

=> **'Check Extension' button pe click karo — Setup Complete!**

Setup Complete!

Congratulations! LeetCode Tracker Companion Extension successfully install ho gayi hai. Ab jab bhi aap LeetCode pe koi problem solve karke submit karoge, solution automatically aapki profile mein save ho jayega!

Tip 1:	Extension sirf ek baar install karni hai, dobara karne ki zaroorat nahi.
Tip 2:	Agar extension kaam na kare, Chrome restart karke try karo.
Tip 3:	Extension tabhi kaam karti hai jab aap LeetCode pe problem submit karo.
Tip 4:	Koi bhi problem ho toh website ka support section check karo.
